

## **The Importance Of Hiring A Qualified Contractor For Electrical Work**

Halton Electric is a family owned and operated electric company that has been serving the Burlington and surrounding communities for over 40 years. Capable of handling all your residential, commercial and industrial electrical needs, Halton Electric's team of licenced and qualified electricians provide a variety of services including 24-hour emergency generator services, seasonal hot tub and pool wiring, security system wiring, plant maintenance, panel changes, and lighting retrofits.

When it comes to your home and utilities, you want to make sure the person you hire is knowledgeable and qualified to complete the task at hand. Before anyone even comes into your home, make sure they have the proper licencing and certification qualifications, and don't forget to ask for referrals or testimonials from a trusted source before signing a contract. An electrician should come from a reputable company with a business address, and be ready to provide their Electrical Safety Authority licence number upon request.

Halton Electric has the experience and reputation to handle any electrical job, big or small. They are actively involved in the Smart Meter Program within the city of Burlington, and perform residential repairs for the Smart Meter process. Halton Electric was also contracted to complete commercial lighting retrofits at Burlington City Hall, Brant Hills Community Centre, and the Burlington Senior's Centre. Trust the experts at Halton Electric to get the job done right the first time.

Halton Electric is Burlington's local solution for quality electrician services. For more information on services or for an in home consultation, visit their website [www.haltonelectric.com](http://www.haltonelectric.com) or call 905-335-2104.

Halton Electric services Halton Hills, Acton, Milton, Georgetown, and the surrounding areas, and offers a one year warranty on all of their workmanship.
